Betty...the attached version of the fact sheet contains changes that we suggest be made to be the most supportive of the RCRA Order we are negotiating with Delfasco. We feel that the fact sheet needs to directly address the long term cancer risk numbers as we best know them currently. Call if we need to discuss.

Beverly,

I'm sorry this is so late getting to you. This is a compilation of comments that Jon sent you previously (his are in blue), along with mine (red) and Rebekah's (green). As I mentioned in my voice mail message, there are still some things that we are trying to work out regarding the language about what is a protective concentration level and what is a toxicity value and what is the process for establishing one, but I can discuss that with you more tomorrow. This will give you an idea though of what we would like to see.
